### Refinement and subtlety are enough for five stars

SPEAKER CABLE  
ECOSSE  
MS2.4

£ 45/m

#### VERDICT

In an appropriate hi-fi system this Ecosse speaker cable will deliver top-class results

**ECOSSE CELEBRATES ITS** 10th birthday with the introduction of a new high-end speaker cable, the MS 2.4. As you'd expect at this price, the technology is impressive: specially formulated copper, processed to minimise crystal boundaries, giving music an easier passage.

There's more tech, but the result is more interesting: a massively detailed cable, revealing subtleties and delivering a fluid and transparent midrange. Some rivals have greater bass punch, but the Ecosse's refined nature is worth full marks.
